MAIL BID LIST #11

CLOSING

OCT. 10 1985

The more I study the tokens that come my way, the more amazed I am at the kinds of places from which tokens can be found. The group assembled here in this list represent some of the most obscure localities on the planet, obscure that is to many, if not most North Americans. But it seems likely that many of the people who had to use them in those places may have been inclined to similar feelings. For example weather conditions in barren, windswept Tierra Del Fuego at the southernmost tip of South America, could provoke many of the sheep ranchers resident there to use even stronger language than mine.

Better known, but still relatively remote from the mainstream of world political processes are Mauritius in the Indian Ocean, Iceland, Madeira and Angola among others, although the latter has achieved some notoriety in recent years. Artifacts of lingering and former empires can be found in tokens from Gibraltar and Italian Africa, as well as from a Foreign Legion in Morocco. German Third Reich medals can be found here along with Judaica from areas that were destroyed by the government of the makers.

Tokens from early Mexico and later Cuba and Guatemala are here with mining tokens from Chile and Peru. Some of the world's rarest **Encased Postage** from Portugal are included along with Austrian, German and U.S. Prisoner-Of-War Camp pieces. A good selection of transportation tokens can be found as well.

Lot descriptions are of necessity brief and oriented to numismatists. Sizes are usually in millimeters, although larger paper pieces are often in inches. Tokens are considered to be round unless otherwise indicated. Materials are shown as Al, Br, Cop, Nkl, Ir, Zn or Pl(astic). Parentheses are often used and mean that the information enclosed is not usually in the token legend. Catalog numbers encountered are found in such, e.g. (L#101.3) and refer to the most standard work for the topic at hand. Since listing each reference would be far too expensive, please write if you need to know which. Dollar values written "Est. \$25" or simply "\$5" mean a suggested bidding range. An MB enclosed with a dollar value in parentheses (e.g. (MB \$25)) means a "Reserve" or "Minimum Bid". Grading can be only approximate in a series as varied as tokens. I have attempted with this catalog to be more conservative and in most cases have reduced items by one grade where there is any question in my mind. Comments on my listings and methods of operation are always welcome.

ISLANDS

1. **Mauritius:** Obv Queen Victoria young head, curved around are **Victoria Ile Maurice**, Rev **Schoenfeld**, 1 (Sou) Bronze, 24.5mm. Condition is Good+ with all legend visible. "Ile Maurice" is faint as though from a recut die. See Remick for a listing of the related "J. Lambert 1852" item. (MB \$120). Est. bidding range should be \$250+ for this genuinely rare merchant's necessity coin.

2. **Iceland.** (an elephant standing to left) **GUDM. JSLEIFSSON**, **EYRARBAKKA**. (No denom.) Brass with loop 20.5mm EF+ oxide spot on elephant. This is one of only two Icelandic tokens I have ever seen other than those for U.S. military. "Eyrarbakka" is a small coastal town somewhat to the SE of Reykyavik. (MB \$50) Est. \$60-75.

MAIL BID LIST #11

Prices Realized

This sale reflected a strong interest in tokens from the British Commonwealth. Bidding on tokens from Mexico and other Latin-American countries was sustained at the usual \$5-15 level. A surprise was a strong interest and keen bidding on tokens of Russia and Switzerland. Tokens used in European colonial areas also received high bids, although bidding was weaker or non-existent for several scarce Portuguese colonial pieces. The reason for the latter no doubt is the appearance on the market of a number of such pieces, especially from Madeira, and the high minimum bids required by the consignor.

Lots not listed received no bids or else bids were too low for consideration. Sale prices are given in even dollar amounts although in many cases sale prices were fractions of a dollar above or below the amount listed. Figures in parentheses are the number of bidders for that lot.

729. British India, CANTEEN/ 4/ ANNAS/ 7.D.G., Uniface Zinc 34mm. A military service club item not listed by Fridmore and issued circa 1880-1914. The 7th Dragoon Guards were an elite cavalry unit with long service in India. All legend is readable, but worn. There is pitting, crusting and a small lump of oxidation on the reverse. A Good at best. However there is no question of its rarity in my mind. (MB \$50) Est. \$125-50

729A. India, Sometime between 1900 and 1920 a Maharaja in Jaipur State issued about 30 square brass dinner invitations. They were delivered in advance by servants to the guests, who in turn had to present them at the gate before they could enter. See the illustration. The handstamped, incuse language is Hindustani. Each was serially numbered on the reverse and this one is 2. Size is 41mm. Fine (MB \$12)

730. Austria-Hungary, J./ GINZKEY/ M. A set of four 18mm glass WWI private Notgeld tokens - 5 in transparent pale blue, 10 in opaque black, 20 in pale green and 50 in amber. These are 5mm thick with rounded edges like medicinal lozenges which they resemble. The numerals of value are incuse in white enamel, circled with dots. The obverse is in raised, uncolored letters. J. Ginzkey, according to the European consignor, was an Austrian glass manufacturer in the town of Maffersdorf, Bohemia (now Czechoslovakia). The letter M. stands for the locality. These are Unc, although with some fingering they are better called EF+. Apparently rare. (MB \$350)

731. Chile, 1/ COYA/ PASAJ. EXT. Oficina Coya was a nitrate mine site in northern Chile early in this century. This token, one of several issues by the firm, is uniface oval nickel, 28x38mm with three horizontal obverse grooves. Legend is incuse and hand-stamped letter by letter into the surface. It states clearly 1 Extra Passage and is thus a ride token. Kenneth Smith has not listed this piece, but according to Elwin Leslie The Anglo-Chilean Nitrate and Railroad Company built and operated its own line which operated between Coya, two other sites and the Pacific Coast. Evidently a piece used by mine employees for travel. (MB \$12) Est. \$15

732. Costa Rica, a Counterstamped 1861 U.S. Indian Head Cent. A 7mm circular, recessed counterstamp reads HABILITADO POR F. PINTO M. or Validated by F. Pinto M. The counterstamp is typical of the die work of the San Jose Mint in the mid to late

19th Century. There are several other dies of the same style which were used on other Costa Rica coins and tokens as well. The Pinto family were coffee growers like many in that country and had holdings around the national capital. Two of these pieces are known, one in an already existing collection of Costa Rica tokens of more than a 1000 pieces. This is the second. The coin is Fine, the counterstamp is VF+. (MB \$150)

733. Penang, International Bodega & Restaurant 5, Brass 18mm. This is really Unc, but some light fingerling makes it an EF+. (Pridmore #32) Issued in the 1890's. Penang is an island off the northwest coast of modern Malaysia. The chief town there is often referred to as Penang. (MB \$12) Est \$25-35

734. Klondyke. The title word is probably misleading. The token reads Margot's Klondyke 2d, Royal Sovereign Whisky; the reverse shows a Jubilee Head of Queen Victoria and is counterstamped 45. Bronze or brass 23mm moderate pitting, about VG. Les Hill in British Columbia says that so far there is no trace of such an establishment in the Yukon. Neil Todd indicates that several of these in brass and copper have turned up in London, England. Maybe Margot made enough money off the miners to set up a pub back home! Est \$20-25.

Coal and coal-mining are popular topics among U.S. hobbyists. Residents of the Appalachian Mountains in the Eastern part of the country are familiar with artifacts made of coal, mostly those carved into souvenirs and sold at gift shops in the area.

The small town of Rothenbach, Bavaria in 1922 was the source of Notgeld or Emergency Coins made from Coal. This was during the well known period of inflation and the C. Conradt firm issued at least three: 100, 500 and 1000 Marks. The rubbing here is one of the 500 Marks with the serial number inscribed 472. Only 2500 of each were struck by the famous Lauer firm of Nuremberg. The pieces are rare. See Lot #441.
